- Computer Science

WORK EXPERIENCE

Backend Developer RESET TECH Global Private Limited

05/2023 - Present

Tasks

- Enhanced API performance, reducing response times by 40% and error rates by 60%, resulting in improved user satisfaction.
- Designed, developed, and maintained APIs on a distributed architecture, ensuring scalability, security, and collaboration with cross-functional teams.
- Created and managed intricate CRON jobs for automated data processing, focusing on efficient scheduling, error handling, and logging for reliability and accuracy.

JavaScript Developer Laxaar Services

09/2022 - 05/2023

Software Service Company

Tasks

- Enhanced Node.js and React legacy code by developing new features, and meeting customer needs. Created efficient debugging for the Docker project, improving issue resolution and project efficiency.
- Engineered and executed 15+ new features for Node.js and React legacy applications; increased overall user satisfaction by 30% and reduced churn rate by 25%.

Software Developer Intern Pplwork

06/2022 - 09/2020

Tasks

- Collaborated with team members to create dynamic and responsive web applications that exceeded user expectations.
- Introduced robust authentication and authorization systems to ensure secure access to user accounts and sensitive information.

SKILLS

Javascript

AWS

PROJECTS

ECommerce (01/2022 - 04/2022) [🔗](#)

- Implemented a full-fledged eCommerce app with all the standard shopping functionality, using MUI components for searching, sorting, pagination, filtering, and category display.
- Integrated Twilio SendGrid for authentication and authorization, enabling users to create profiles, update their avatars and passwords, and receive transactional emails.
- Leveraged Stripe and Cloudinary to handle payments and image data, respectively, ensuring secure and efficient handling of sensitive user data.

Instagram Clone (02/2022 - 03/2022) [🔗](#)

- Developed a complete clone of the Instagram app with all the standard social media functionality, including authentication, authorization, following, adding comments, likes, and suggesting new users.
- Utilized Firebase as a backend to handle the application logic, ensuring efficient and scalable handling of user data and interactions.
- Enhanced user account security and protect sensitive information through strengthened authentication and authorization protocols.

Food Delivery App (08/2022 - 03/2023) [🔗](#)

- Created a food delivery app using React Native, leveraging expertise in cross-platform mobile app development and UI/UX design.
- Integrated Google Cloud Maps to enable users to easily locate their order and track their order status in real-time.
- Utilized AWS Amplify as the backend, ensuring secure and efficient handling of user data, orders, and payments.
